 - III. Claims 37-47, drawn to device for testing a force, classified in class 73, subclass 766.

The inventions are distinct, each from the other because of the following reasons:

The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the claims of the invention of Group I are directed to method to determine an energy amount with their own limitations as step to come up with the energy amount. The claims of group II, however, are apparatus for testing an actuator. The claims of Group III, on the other hand a force testing device with their own limitations such as columnar support and other related limitations is a. See MPEP § 806.05(d).

Art Unit: 2855

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
